Career Objective

BCA student (CGPA 8.9) with hands-on experience in **machine learning, statistical analysis, and Python automation**. Built **weighted logistic regression** and **gradient boosting** models on 1.15M national survey records, validated against official MoSPI figures, and developed a **Python–Flask tool** at Zippee that cut a weekly payout process from hours to minutes. Skilled in **Python, SQL, scikit-learn, and Pandas**; **Oracle Cloud AI Foundations** certified. Seeking a **Data Science or AI/ML internship**.

Education

Jagannath International Management School (JIMS), Vasant Kunj Delhi, India
Bachelor of Computer Applications — Current CGPA: **8.9** *2024 – Present*

Skills

Languages: Python, SQL, C/C++
ML & Statistics: scikit-learn, Logistic Regression, Gradient Boosting, Survey-Weighted Analysis, Model Evaluation (AUC)
Data Science: Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis
Databases & Cloud: MySQL, Relational Database Design, Oracle Cloud Infrastructure (AI Foundations)
Business Intelligence: Power BI, DAX, Excel (Advanced) **Tools:** Flask, Git, GitHub
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems

Projects

Women's Labour Force Participation, India (PLFS 2025) | *Python, Pandas, scikit-learn* | GitHub
- Analyzed **1.15M-record** national survey microdata using **survey weights**, and **validated** results against published MoSPI figures (**40.0%** female, **79.1%** male participation).
- Built **weighted logistic regression** and **gradient boosting** models (**AUC 0.763**) to identify drivers of women's workforce participation, uncovering a **U-shaped relationship** with education.

Last-Mile Rider Payout Automation | *Python, Flask, Pandas* | GitHub
- Developed a **web-based automation tool** that turns raw rider attendance files into formatted payout workbooks, supporting **11 vendor rate schemes** across 11 stores.
- Automated payout calculation and workbook generation end to end, cutting weekly processing from **hours to minutes** and **minimizing manual calculation errors**.

Retail Sales Analysis | *Python, MySQL, Pandas, Matplotlib* | GitHub
- Structured **209,874** retail records into a normalized **MySQL database** (**5 relational tables**) and ran exploratory analysis in Python, Pandas, and Matplotlib.
- Found that the West generated **31.6%** of sales, Technology **$836K**, and Home Office had the highest average order value (**$241**).

Experience

Data Analyst Intern May 2026 – Sept 2026
Zippee, Delhi
- Built a **Flask automation tool** using **Python and Pandas** that converts raw attendance data into formatted payout workbooks, cutting a manual weekly process from **hours to minutes**.
- Audited weekly payouts across **11 stores** for in-house and vendor riders, flagging discrepancies to improve **billing accuracy**.
- Built **Power BI** dashboards and **Excel** trackers used for weekly Management Information System (MIS) reporting.

Technical Assistant Director Oct 2026 – Present
Google Developers Group (GDG), JIMS
- Plan and run **technical events and workshops** for student developers, coordinating speakers and members.
- Support the core team with **member communication** and event logistics.

IPR Coordinator – Institution's Innovation Council (IIC) 2025 – 2026
Jagannath International Management School (JIMS), Delhi
- Coordinated **30+** sessions and workshops (40–50 attendees each) with faculty, student teams, and industry experts.
- Led Smart India Hackathon 2025 as Main Coordinator for **100+ participants**, managing registrations, volunteers, and logistics. Also placed **2nd** at the inter-college level as a participant.

Certifications

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate – Oracle
Artificial Intelligence Fundamentals – IBM SkillsBuild
Google Data Analytics Professional Certificate – Coursera
